Sangoma and Partners to Demonstrate Leading Asterisk-Based Solutions at AstriEurop 2010

Booth demos will feature flexible and cost effective open source solutions for carriers, contact centers, large enterprises and small-medium businesses

WHAT: At [AstriEurop](#) 2010, the leading conference bringing together the European Asterisk community, [Sangoma Technologies Corporation](#) will showcase in its booth (Stand A4) solutions from six application partners. These solutions are representative of the breadth of Asterisk-based communication applications that run on Sangoma's voice and data connectivity products. The exhibits include open source solutions fit for carriers, contact centers, large enterprises and small-to-medium businesses.

- **Amiritel** – The company develops and markets AMIRIBOX, a leading software-based IP-PBX packaged in an easy-to-use appliance which includes Sangoma telephony boards for digital interfaces. With simplified management and personalized support, AMIRIBOX is an ideal communication solution for the SMB.
- **First Telecom** – First Telecom will demonstrate BridgelT Skype gateways for enterprises and SMBs, which allows for complete integration of existing VoIP, analog and digital PBX systems into the Skype network. BridgelT uses Sangoma analog and digital cards to bring cost effective Skype calling to legacy PBX systems.
- **Foncordiax** – The company will demonstrate the Foncordiax appliance, a complete 'Plug n Go' IP PBX system based on Sangoma hardware. The range covers various environments and all can connect to any analogue or digital lines and/or make use of new VoIP services. Systems have been designed to be quick to install, easy to configure and maintain, and are based on solid, reliable and eco-friendly components.
- **Leonix** – Leonix will demonstrate its IPTG 800/8000 IP Telephony Gateway product, which uses Sangoma telephony interface cards and SS7 signaling software. The solution allows small operators to cost effectively connect to France Telecom and other incumbent operators, in order to rapidly introduce new revenue generating services such as SIP trunking, interconnect services, hosted PBX or other.
- **Openote** – Openote provides solutions based on ViciDial, a complete open source inbound, outbound and blended Contact Center suite. The Contact Center software routes calls from service provider to agents, as well as provides automatic call distribution, predictive dialing, IVR and some PBX functionality. The ViciDial suite leverages the Call Progress Analysis capabilities of Sangoma's NetBorder Call Analyzer software,

along with Sangoma cards and the VoiceTime USB device, to optimize the performance of outbound contact center operations.

- **ScopServ International** – The ScopTEL™ IP PBX, based on Sangoma telephony interface cards, will be showcased by ScopServ. The solution combines the power and cost effectiveness of open source telephony, with robust, easy-to-use and fully integrated management and deployment tools. The product suite covers SMB and enterprise needs.

Sangoma European distributors Allnet France and Halokwadrat will also be joining Sangoma in the booth to engage with resellers in their respective markets.

WHEN: April 14-16, 2010

WHERE: Espace Champerret
Stand A4
Paris, France

WHY: Experience the breadth of open source PBX, IVR, contact center and carrier applications that run on Sangoma's voice and connectivity software. Learn how leading organizations all across Europe rely on the power of Asterisk-based applications for efficient and cost-effective communication solutions from Sangoma's partners.
